

Asbestos Awareness

This Asbestos Awareness course exclusively covers Category A training and is designed to ensure that anyone who may come into contact with asbestos knows what asbestos is, where it can be found, the dangers of asbestos and how to protect themselves from accidental exposure.

If you're in a building that was built before the year 2000, it probably contains asbestos. The dangers that asbestos presents are serious, with it being responsible for around 5,000 deaths per year.

Employers must ensure that anyone who could disturb asbestos while carrying out their everyday work understands what asbestos is and how to work in a competent and safe way, without risk to themselves or others.

The course

Highfield's Asbestos Awareness e-learning course relates exclusively to Category A training and is designed to ensure that anyone who may come into contact with asbestos knows what asbestos is, where it can be found, the dangers of asbestos and how to protect themselves from accidental exposure.

Learners undertaking this course will gain the knowledge and skills required to work safely with asbestos, ensuring that they, and others, remain safe.

Areas covered.
